COMICCRAFT — FUNCTIONAL FEATURES

==========

FEATURE COUNT: 10

1. Story Prompt Input

User can type any story idea (e.g., "A brave fox in an enchanted forest")

2. Character Name Input

User specifies the main character for consistent naming

3. Setting Selection

Dropdown with forest, city, space, school, ocean, mountain

4. Tone Selection

Dramatic, funny, light-hearted, poetic, mysterious

5. Art Style Selection

Anime, comic book, realistic, pixel art, watercolor

6. AI Panel Outline Generation

Gemini creates a structured 5-panel JSON outline with:

- panel number

- title

- scene description

- image generation prompt

7. AI Narration & Dialogue Generation

Gemini writes full comic-style narration and character lines for all 5 panels

8. AI Image Generation

Pollinations.ai creates a unique illustration for each panel based on the image prompt (768x768 resolution)

9. Live Comic Preview

All 5 panels displayed sequentially with:

- panel title
- AI illustration
- scene description in italics
- narration text in a bordered box

10. Error Handling

- Graceful fallback if outline fails
- "Image unavailable" placeholder if image generation fails
- Rate limit errors shown in preview page

BONUS FEATURES

- UUID-based filenames prevent collisions
- Regex extraction of JSON from AI responses
- Fallback story splitting when panels don't split evenly
- Clean separation of AI text and AI image concerns
