COMICCRAFT — DEMONSTRATION OF PROPOSED FEATURES

==========

DEMO SCRIPT (approx. 4 minutes)

[00:00] Introduction

Show homepage at http://127.0.0.1:8000

"This is ComicCraft — an AI-powered comic creator that turns a simple text prompt into a complete 5-panel comic book."

[00:20] Fill the form

- Story Prompt: "A brave fox exploring an enchanted forest"
- Character Name: "Fox"
- Setting: "Forest"
- Tone: "Dramatic"
- Art Style: "Anime"

[00:40] Click "Generate Comic"

"The backend is now running three steps: creating the 5-panel outline, writing the narration, and generating 5 illustrations."

[01:00] Show outline generation

(Optional: open VS Code terminal to show Gemini API calls)

[01:30] Show image generation in progress

"The five illustrations are being created one after another by

Pollinations.ai. This usually takes about 30 seconds."

[02:00] Comic preview appears
"Here is the complete comic. Panel 1, 'The Forest's Edge', shows our protagonist Fox at the edge of a mysterious forest with proper narration below."

[02:20] Scroll through panels 2 through 5
"Each panel has a title, a unique AI-generated illustration, a scene description, and full narration with dialogue."

[03:00] Show the PDF export option
"Users can save the entire comic as a PDF for printing or sharing."

[03:20] Show error handling
"Even if an image fails to generate, the app shows a placeholder instead of breaking."

[03:40] Closing
"ComicCraft makes comic creation free, fast, and accessible to anyone with a story idea."

[04:00] End
